

CUSTOMER SNAPSHOT

“We required a tool for our staff to manage work requests and to plan for preventive maintenance activities.”

Tony Marco
Facility Manager Dubai
MULTIPLEX

CHALLENGE

In a newly established complex, with a newly established team, setting up our systems and process was vital to the successful start-up of managing this large facility.

SOLUTION

DOTNETconnect developed a maintenance work request and preventive maintenance system that we were able to install and begin using straight away.

BENEFITS

Having a system to use from the start, allowed a solid base for process control and made it easy for the team working from a single system.
