

CUSTOMER SNAPSHOT

“having a system to help manage our portfolio of clients facilities makes it a lot easier for my staff

Janelle Jones National Facilities Manager KNIGHTFRANK

CHALLENGE With an increasing number of facilities under management, we needed a flexible system to keep track of contract renewal dates, track facility repairs and track facility costs.

SOLUTION dotnetconnect developed a comprehensive and simple to use system which allows the daily management of all facilities under management contract.

BENEFITS The system allows current up to date reporting on the financial status of all facilities under management and raises alerts ahead of time to allow the team to prepare for the next round of client contract negotiations. A structured software solution is so much better than using excel spreadsheets
